

UNIVERSITY OF LEEDS

CANDIDATE BRIEF

Data Collection Coordinator, Faculty of Medicine and Health

Salary: Grade 5 (£22,214 – £25,728 p.a.) A maximum of £23,557 p.a can be offered due to funding limitations

Reference: MHLCM1127

Closing date: 2 January 2018

Interviews are expected to take place in early January 2018

Fixed-term for 2.5 years. Available from 1 March 2018

Data Collection Coordinator

School of Medicine, Leeds Institute of Cardiovascular and Metabolic Medicine

Division of Epidemiology & Biostatistics

Do you want to contribute to a world-leading research database on children and young people's cancer? Do you have exceptional data co-ordination skills and are you looking for the next challenge? Are you able to juggle multiple tasks and see them through to completion?

You will manage all aspects of the cancer registration process for the [Yorkshire Specialist Register of Cancer in Children and Young People](#) ensuring compliance with the specified Register requirements and standards. You will have responsibility for collecting high quality demographic and clinical data for all new registrations from 16 different acute hospital Trusts across the Yorkshire and the Humber geographical area; approximately 400 new registrations are made annually. This will involve liaison with a wide range of people across the National Cancer Registration and Analysis Service (NCRAS), Public Health England and the NHS, including IT, patient services offices, nurses and GPs.

You will have strong IT skills to manage and process electronic data feeds from multiple providers. Responsibility for data quality and organisation of local and national meetings is integral to the position. Therefore, excellent attention to detail and self-management skills for planning and prioritising are essential.

You will be based within the Yorkshire Register research group which carries out a programme of epidemiology and applied health research. Travel is required to visit designated hospitals for the abstraction of data from patients' case notes.

What does the role entail?

As a Data Collection Coordinator your main duties will include:

- Overseeing clinical and socio-demographic data collection including visiting designated hospitals, co-ordinating the receipt and validation of electronic datasets and preparing data for registration;

- Responsibility for the day to day data management of the Register including monitoring data and quality assurance;
- Overseeing the integrity of the Register database, held in Microsoft SQL Server, with input from key groups and colleagues;
- Carrying out duties in accordance with relevant guidelines and protocols and ensuring relevant governance and ethical rules are adhered to;
- Reviewing and developing procedures and guidelines relating to data entry, validation, extraction, storage and retention;
- Coordinating the preparation of accurate datasets and working to agreed deadlines set for these;
- Organising the production of regular reports on incidence rates and data quality for meetings and/or the team as requested;
- Organising, and providing full administrative support to, annual Scientific Advisory Group meetings.

These duties provide a framework for the role and should not be regarded as a definitive list. Other reasonable duties may be required consistent with the grade of the post.

You will report to Dr Richard Feltbower, Senior Lecturer in Epidemiology.

What will you bring to the role?

As a Data Collection Coordinator you will have:

- A good level of education including GCSE Maths and English at Grade C or above or equivalent;
- Excellent IT skills including Excel, Word, database packages and an aptitude for data-handling e.g. electronic methods of data capture, transfer and presentation;
- Excellent organisational and self-management skills for planning, prioritising and organising own work to tight deadlines;
- The ability to work methodically with accuracy and attention to detail;
- Self-motivation and enthusiasm with the ability to work on own initiative and under pressure without close supervision;
- The ability to work within a multi-disciplinary team and foster good working relationships with health professionals;

- The ability to identify and extract data from clinical records which contain complex medical terminology;
- The ability to exercise personal initiative and responsibility and to use own judgement to solve problems;
- Excellent verbal and written communication skills including dealing with enquiries and producing reports.

You may also have:

- Experience of working in a disease registry or research office environment;
- Experience of cancer terminology and cancer coding systems;
- Experience of SQL programming skills;
- Experience of medical research and/or cancer registration;
- Knowledge of NHS infrastructure including research governance approval processes;
- A current full UK driving license to visit medical record sites which may be inaccessible via public transport.

How to apply

You can apply for this role online; more guidance can be found on our [How to Apply](#) information page. Applications should be submitted by **23.59** (UK time) on the advertised closing date.
