

**UNIVERSITY OF LEEDS**

## **CANDIDATE BRIEF**

**Research Fellow / Senior Research Fellow in Energy and  
Macroeconomics, Faculty of Environment**

**Salary: Grade 7 (£32,548 – £38,833 p.a.) / Grade 8 (£39,992 – £47,722 p.a.)**

**Reference: ENVEE1262**

**Closing date: 15 August 2018**

**Fixed term for 3 years (external funding)**

**Job share and flexible working arrangements will be considered**

## **Research Fellow / Senior Research Fellow in Energy and Macroeconomics, School of Earth and Environment, Faculty of Environment**

**Would you like to join the largest national research centre on energy demand in the UK? Do you want to further your career by applying your quantitative analysis skills as part of a leading research group on energy, materials and economy modelling in one of the UK's foremost research intensive universities? If so, this could be the opportunity for you.**

### **Research: Exploring low energy demand futures for materials and products in the UK by applying macroeconomic modelling**

You will join a highly successful research group within the Sustainability Research Institute that conducts research on energy demand reduction and low carbon transitions using a range of modelling techniques such as Multi-Regional Input-Output Analysis (MRIO), macroeconometric models, energy and exergy analysis and scenario development. This position allows you to apply your knowledge of macroeconomics to policy relevant questions on the role of industry in achieving a low carbon future.

The team, led by Professor John Barrett, is funded under the UK Centre for Research on Energy Demand Solutions (CREDS), a new £19m, 5 year Energy Programme initiative involving leading UK universities. This is a substantial commitment by the UK Government to fund research to understand the drivers that determine our energy demand and the mechanisms by which to reduce it. The research team also hosts the Centre for Industrial Energy, Materials and Products ([www.ciemap.ac.uk](http://www.ciemap.ac.uk)) and is a core partner of the UK Energy Research Centre ([www.ukerc.ac.uk](http://www.ukerc.ac.uk)). You will be joining an established research group of 10 researchers from a wide range of disciplines including economics, engineering, mathematics, geography and environmental science. The research group has a very strong track record of publishing in high ranking peer-reviewed journals. You will be working to deliver the agreed work programme with the team.

## What does the role entail?

As Research Fellow (Grade 7), your main duties will include:

- Adapting the existing MARCO-UK to provide a more detailed understanding of the role of different industrial sectors in the UK economy;
- Helping to build and test a new version of MARCO-UK for CREDS, incorporating planned revisions to energy inputs, material use, and industrial sectors and finance/debt.;
- Developing detailed scenarios for low energy demand futures for UK industry (combining MRIO with macroeconomic approaches);
- Providing insights into how the Industrial Strategy can deliver productivity gains while addressing energy demand reduction and achieving net zero emissions;
- Providing insights into how energy and material productivity gains can deliver the energy demand and emissions reductions to meet the ambition of the Industrial Strategy and Clean Growth Strategy;
- Developing and assessing strategies related to the more efficient use of resources to deliver reductions in industrial energy demand;
- Working with policy makers (e.g. BEIS, CCC) and other themes in CREDS to deliver impact.
- Working with and in support of Prof John Barrett research grant to ensure the project is successfully completed;
- Generating and pursuing original research ideas in the appropriate subject area;
- Developing research objectives and proposals and contributing to setting the direction of the research project and team including, where appropriate preparing proposals for funding in collaboration with colleagues;
- Evaluating methods and techniques used and results obtained by other researchers and to relate such evaluations appropriately to your own work;
- Communicating or presenting research results through publication or other recognised forms of output;
- Preparing papers for publication in leading international journals and independently writing reports;
- Working both independently and also as part of a larger team of researchers, engaging in knowledge-transfer activities where appropriate and feasible;
- Maintaining your own continuing professional development and acting as a mentor to less experienced colleagues as appropriate;
- Contributing to the research culture of the Institute, where appropriate;

Contributing to the training of both undergraduate and postgraduate students, where appropriate, including assisting with the supervision of projects in areas relevant to the project.

As Senior Research Fellow (Grade 8), your duties will include:

- Working with Professor John Barrett and the Centre's Senior research fellow to ensure the CREDS work programme is successfully completed;
- Contributing to setting the direction, outputs and outcomes of the research projects listed in the work programme;
- Undertake economic modelling to link industrial energy with materials with the economy;
- Working with other team members to run simulations on low energy / low carbon industrial futures;
- Building and testing a new version of the MARCO-UK model for the CREDS project, where improvements are required (this includes sector definition, distributional impacts, understanding of materials for example);
- Communicating and presenting research results through publications or other recognised forms of output at international conferences;
- Publishing research papers with the team on this work in high-ranking, peer reviewed journals;
- Planning and managing your own research activity in collaboration with others;
- Interacting with, and providing assistance to, other staff and research students within the research group and the School;
- Identifying other research project opportunities and directions as they arise, and assisting in the writing of grant proposals;
- Playing a key role in fostering the wider dissemination and impact of research findings, including actively engaging in knowledge exchange activities in collaboration and support of the project team.

These duties provide a framework for the role and should not be regarded as a definitive list. Other reasonable duties may be required consistent with the grade of the post.

## What will you bring to the role?

As Research Fellow (Grade 7) you will have:

- A PhD (or close to completion) or relevant experience demonstrating an interdisciplinary approach to problem-orientated research;
- A good level of numerical literacy;
- A sound knowledge of econometric modelling including ex-ante and ex-post simulations;
- Knowledge of E-Views (desirable but not essential);
- A demonstrable commitment to research, including:
  - Ability to identify research objectives;
  - Independence/initiative in tackling research problems;
  - Ability to work effectively as part of a collaborative team.
- Excellent communication skills, including presentation skills, evidenced by contributions to international conferences and/or meetings;
- A track record of, or good potential, for publication of peer-reviewed journal articles;
- A strong desire to engage extensively with key stakeholders;
- An enthusiastic approach and helpful manner combined with a willingness to help colleagues during times of pressure;
- The ability to work under pressure and to meet deadlines.

In addition for appointment as Senior Research Fellow (Grade 8) you will have:

- At least 4 years' experience as a researcher in the field beyond your PhD;
- Strong track record of, or good potential, for publication of peer-reviewed journal articles;
- Evidence of project management;
- Experience of managing junior staff.

## How to apply

You can apply for this role online; more guidance can be found on our [How to Apply](#) information page. Applications should be submitted by 23.59 (UK time) on the advertised closing date.

Your application should include:

- a supporting statement evidencing how you believe your existing knowledge and experience equips you to carry out the role;
- a copy of your curriculum vitae giving full details of qualifications and experience.

## Contact information
