

UNIVERSITY OF LEEDS

CANDIDATE BRIEF

Research Fellow in Nutrition and Lifestyle Analytics, School of Food Science and Nutrition, Faculty of Environment

Salary: Grade 7 (£37,099– £44,263 p.a.)

Reference: ENVFS1110

Fixed-term for 12 months from 1st July 2024 to provide maternity cover

We will consider job share and flexible working arrangements

Research Fellow Nutrition and Lifestyle Analytics

School of Food Science and Nutrition and Leeds Institute for Data Analytics

Are you an ambitious researcher looking for your next challenge? Do you have a PhD in data science, epidemiology, statistics, mathematics and domain expertise in healthy and sustainable diets? Do you want to further your career in one of the UK's leading research intensive Universities?

The Nutrition and Lifestyle Analytics team are based between the School of Food Science and Nutrition and the interdisciplinary setting of the Leeds Institute for Data Analytics, working closely alongside the [Consumer Data Research Centre \(CDRC\)](#).

A Research Fellow is required to work on a major project, funded by the IGD (Institute of Grocery Distribution) – a social impact organisation - to evaluate the impact of pilot trials to promote healthier and more sustainable diets in an in-store setting. The Research Fellow will analyse customer sales/loyalty card data in combination with the nutrition/health metrics and sustainability indicators. The programme works with the IGD and their 20 retailer and manufacturer working group members, who are implementing consumer behaviour change interventions. For more information about this project, please click [here](#).

This project is led from the School of Food Science and Nutrition at the University of Leeds but works closely with scholars from other disciplines. You will report to Professor Michelle Morris who leads the Nutrition and Lifestyle team and work closely with Professor William Young (Business and Sustainability) and Dr Alison Fildes (Psychology).

What does the role entail?

As a Research Fellow your main duties will include:

- Manipulating and analysing consumer data that falls within the scope of the healthy and sustainable diet projects, using advanced research techniques/pre-determined methods;
- Generating and pursuing original research ideas in the appropriate subject area;

- Developing research objectives and proposals and contributing to setting the direction of the research project and team including, where appropriate preparing proposals for funding in collaboration with colleagues;
- Presenting findings of research, for example, preparing papers, blog posts and making presentations, with guidance and advice as appropriate;
- Evaluating methods and techniques used and results obtained by other researchers and to relate such evaluations appropriately to your own work;
- Preparing papers for publication in leading international journals and independently writing reports;
- Working both independently and also as part of a larger team of researchers, engaging in knowledge-transfer activities where appropriate and feasible;
- Maintaining your own continuing professional development and acting as a mentor to less experienced colleagues as appropriate;
- Facilitating communications between team members, by setting up meetings and sharing materials as appropriate;
- Contributing to the research culture of the School, where appropriate;
- Contributing to the training of both undergraduate and postgraduate students, where appropriate, including assisting with the supervision of projects in areas relevant to the project.

These duties provide a framework for the role and should not be regarded as a definitive list. Other reasonable duties may be required consistent with the grade of the post.

You will report to Michelle Morris, Professor of Data Science for Food.

What will you bring to the role?

As a Research Fellow you will have:

- A first degree and PhD (or have submitted your thesis before taking up the role) in a relevant area of study (for example, data science, epidemiology, statistics, mathematics) or a closely allied discipline;
- A strong background in Nutrition and Health research domain;
- Proven ability to structure, manage and work with advanced quantitative data;
- Evidence of capacity to design and undertake research and contribute into a wider research programme;
- Demonstrated experience of conducting research;

- Proven ability to write to the standard required for research reports/international publications;
- Good time management and planning skills, with the ability to meet tight deadlines and work effectively under pressure;
- Good time management and planning skills, with the ability to meet tight deadlines and work effectively under pressure;
- Proven ability to manage competing demands effectively, responsibly and without close support;
- A proven ability to work well both individually and in a team;
- A strong commitment to your own continuous professional development.
- Evidence of ability to work in interdisciplinary teams;

You may also have:

- A track record of successful, high quality, publications on nutrition and health analytics;
- Experience in building working relationships with others from different backgrounds;
- Experience working with external stakeholders from industry or the public sector;
- Experience of combining diverse data sources in research projects;
- Previous broad based scholarly experiences, for instance, contributions to publications, individual and collaborative research projects, research proposals and applications for funding.

How to apply

You can apply for this role online; more guidance can be found on our [How to Apply](#) information page. Applications should be submitted by **23.59** (UK time) on the advertised closing date
