

UNIVERSITY OF LEEDS

CANDIDATE BRIEF

Research Fellow in Machine Learning System Design for Large AI Models, Faculty of Engineering and Physical Sciences

Salary: Grade 7 (£39,355 – £46,735 p.a.)

Reference: EPSCP1169

Leeds Main Campus

Closing date: Monday 26 May 2025

Fixed-term until 30 September 2025

We are open to discussing flexible working arrangements

Research Fellow in Machine Learning System Design for Large AI Models, School of Computer Science.

Do you have in-depth knowledge of distributed systems? Have you ever designed and implemented system components for a large cloud platform? Would you like to bring your technical skills to real-world productions? Do you want to participate in LLM-related events and advance?

In this role, you will take the lead in developing innovative system designs for Large Language Models (LLMs). The project, funded by EPSRC IAA, is aimed at a spin-out company that will make a big difference in society.

The project aims to design a novel ML-oriented system for large AI models from scratch, taking into account their training, inference and user-friendly deployment. The new platform supports fast and cost-effective methods for users, meaning more engineers and academic researchers can participate in LLM-related research without worrying about high hardware costs. You will also be responsible for external validation partners and will lead the engineering team to complete the relevant validation.

Collaboratively, we will conduct cutting-edge research and expand this through the project funding. In particular, this role offers the opportunity to advance research efforts in the area of AI systems and middleware. These amazing features that we have proposed will help us maintain a leading position in this field.

What does the role entail?

As a Research Fellow, your main duties will include:

- Leading the development of a ML system for Large Language Models (LLMs);
- Leading the implement the system components proposed, supporting expected features;
- Contributing towards hub showcase and demo events;
- Working on a business model based on this system for a spin-out company;
- Achieving a novel platform that outperforms the existing competitors;
- Generating and pursuing independent and original research ideas in the appropriate subject area;

- Developing research objectives and proposals and contributing to setting the direction of the research project and team including preparing proposals for funding in collaboration with colleagues;
- Making a significant contribution to the dissemination of research results by publication in leading peer-reviewed journals and by presentation at national and international meetings;
- Working independently and as part of a larger team of researchers, both internally and externally, to develop new research links and collaborations and engage in knowledge transfer activities where appropriate;
- Evaluating methods and techniques used and results obtained by other researchers and to relate such evaluations appropriately to your own research;
- Maintaining your own continuing professional development and acting as a mentor to less experienced colleagues as appropriate;
- Contributing to the training of both undergraduate and postgraduate students, including assisting with the supervision of projects in areas relevant to the project.

These duties provide a framework for the role and should not be regarded as a definitive list. Other reasonable duties may be required consistent with the grade of the post.

What will you bring to the role?

As a Research Fellow, you will have:

- A PhD (or have submitted your thesis before taking up the role) in Computer Science;
- A strong background in cloud computing and distributed system;
- First-hand industrial experience in the Large Language Models (LLMs) field;
- Good leadership that can push the project forward in a healthy direction;
- Good time management and planning skills, with the ability to meet tight deadlines and manage competing demands effectively without close support;
- A developing track record of peer-reviewed publications in international journals;
- Excellent communication skills both written and verbal, and the ability to communicate your research at national and international conferences;
- A proven ability to work well both independently and in a team;
- A strong commitment to your own continuous professional development.

You may also have:

- Experience of pursuing external funding to support research;
- Python, C/C++ programming languages.

How to apply

You can apply for this role online; more guidance can be found on our [How to Apply](#) information page. Applications should be submitted by **23:59** (UK time) on the advertised [closing date](#).

Contact information

Additional information

Faculty and School Information

Further information is available on the research and teaching activities of the [Faculty of Engineering & Physical Sciences](#), and the [School of Computer Science](#).

Working at Leeds

We are a campus-based community and regular interaction with campus is an expectation of all roles in line with academic and service needs and the requirements of the role. We are also open to discussing flexible working arrangements. To find out more about the benefits of working at the University and what it is like to live and work in the Leeds area visit our [Working at Leeds](#) information page.

A diverse workforce

As an international research-intensive university, we welcome students and staff from all walks of life and from across the world. We foster an inclusive environment where all can flourish and prosper, and we are proud of our strong commitment to student education. Within the Faculty of Engineering and Physical Sciences we are dedicated

to diversifying our community and we welcome the unique contributions that individuals can bring, and particularly encourage applications from, but not limited to Black, Asian and ethnically diverse people; people who identify as LGBT+; and people with disabilities. Candidates will always be selected based on merit and ability.

The Faculty of Engineering and Physical Sciences are proud to have been awarded the Athena SWAN [Silver](#) Award from the Equality Challenge Unit, the national body that promotes equality in the higher education sector. Our [equality and inclusion webpage](#) provides more information.

Information for disabled candidates

Information for disabled candidates, impairments or health conditions, including requesting alternative formats, can be found under the 'Accessibility' heading on our [How to Apply](#) information page or by getting in touch by emailing HR via hr@leeds.ac.uk.

Criminal Record Information

Rehabilitation of Offenders Act 1974

A criminal record check is not required for this position. However, all applicants will be required to declare if they have any 'unspent' criminal offences, including those pending.

Any offer of appointment will be in accordance with our Criminal Records policy. You can find out more about required checks and declarations in our [Criminal Records](#) information page.

Salary Requirements of the Skilled Worker Visa Route

Please note that this post may be suitable for sponsorship under the Skilled Worker visa route but first-time applicants might need to qualify for salary concessions. For more information, please visit [the Government's Skilled Worker visa page](#).

For research and academic posts, we will consider eligibility under the Global Talent visa. For more information, please visit [the Government's page, Apply for the Global Talent visa](#).
