

UNIVERSITY OF LEEDS

CANDIDATE BRIEF

**NIHR Academic Clinical Lecturer in General Practice (NIHR Research Theme - Digital)
Faculty of Medicine and Health**

Salary awarded depending on applicant's current NHS pay scale (Salaried GP Scale £76,038-£114,743).

Reference: MHIHS1441

Available for up to 4 years

NIHR Academic Clinical Lecturer in General Practice (NIHR Research Theme - Digital) Faculty of Medicine and Health, School of Medicine Leeds Institute of Health Sciences

Do you want the opportunity to develop your existing academic experience in a supportive and inspirational environment where you can establish your clinical academic career?

Applications are invited for a NIHR Integrated Academic Training Clinical Lecturer post in **General Practice (NIHR Research Theme - Digital)**. The post is available for four years for General Practice candidates who are post-CCT. You will join the vibrant Integrated Academic Training programme at Leeds which provides a supportive research environment to develop independent, novel research alongside your clinical practice.

The successful candidate will spend 50% of the appointed period continuing or establishing a new research programme with 50% of the appointed period allocated to appropriate clinical training or practice. There are opportunities to align to current research interests within the **Leeds Institute of Health Sciences (LIHS)**. You will undertake internationally regarded research and have the benefit of senior academic support in developing grant applications, as well as independent mentoring on career progression. You will also share responsibility for delivering high quality undergraduate and postgraduate teaching programmes.

You will have submitted your PhD/MD at the time you apply and will provide evidence that you have been fully awarded your degree by the time you take up the post. The post is located in Leeds Institute of Health Sciences and in a general practice partnership, the location of which is negotiable.

The successful applicant must be in post by 1 September 2026

What does the role entail?

As an NIHR Clinical Lecturer, it is envisaged that five sessions of your time will be spent in innovative and scholarly research (including up to one session teaching) and for five sessions you will undertake appropriate clinical practice.

Research

You will be expected to achieve and maintain an active research portfolio, both producing regular publications and developing the skills required to write successful research grants and Intermediate, Advanced or Clinician Scientist Fellowship applications. Your research output would be expected to be of international quality as judged by Research Excellence Framework standards. You would be expected to seek external peer review funding to support your research. There may be flexibility within the particular clinical training program to allow substantial periods of research without clinical commitment rather than combining both in the working week.

The post-holder will be expected to develop a research programme related to digital research within our **Healthy Ageing, Multiple Long-Term Conditions (MLTCs) and Frailty** theme, led by Andy Clegg, Professor of Geriatric Medicine and NIHR Research Professor. This research theme addresses the needs of our ageing society by aiming to maximise independence in later life, improve health outcomes for people living with MLTCs and frailty, and the development and evaluation of care for older people. The theme involves working with large datasets and a range of digital data sources has strong regional, national and international collaborative links, including with [Health Data Research UK \(HDRUK\) North](#) and the [NIHR Applied Research Collaboration Yorkshire and Humber](#).

All of our research is based upon established regional, national and international collaborations spanning research, practice and policy. The design, delivery and dissemination of our research regionally is often undertaken in partnership with [West Yorkshire Research and Development](#).

Teaching

You will be expected to contribute to the organisation and delivery of undergraduate teaching throughout your clinical and research years. The administrative, preparation time and actual teaching would not exceed the equivalent of one session each week. During clinical periods the person would be expected to undertake teaching and training commitments as expected of other General Practitioners.

Clinical Activity

The post-holder will be expected to undertake clinical practice within West Yorkshire and be registered on a relevant provider list. However, clinical placements elsewhere will be considered. The post-holder will work as a salaried general practitioner for an average weekly clinical commitment of up to 50% FTE. The selection of the host general practice is negotiable; it will partly reflect the ability of the host practice to provide a clinical and working environment that supports the post-holder's needs and fit with any strategic partnerships with the University of Leeds.

The precise job plan will be agreed with the host practice but should include the following elements and expectations:

- *Clinical duties:* appointments, visits, dealing with telephone queries from patients or other health care professionals.
- *Administration:* whether arising directly from this caseload (referrals, investigations, results) and indirectly (reports, medicals, etc).
- *Primary care team meetings:* formal or informal, essential to the delivery of team based care, discussing clinical practice standards, developing practice protocols, mutual professional support for the individual practitioners, audit, significant event analysis, meetings with colleagues in the locality, care trust etc. Where these occur on an ad hoc basis, adjustments to clinical workload may be required.
- *Personal CPD (continuing professional development) time:* This may include a mix of in-house meetings and events, time away from the practice, either in private study, attending educational events or time in lieu of attending educational events outside of normal working hours.

The job plan may also accommodate clinical management and service development as agreed with health and social care bodies, such as the West Yorkshire and Harrogate Health and Care Partnership.

The post-holder will be expected to pursue a programme of CPD in accordance with the requirements of the Royal College of General Practitioners or another recognized body, and to undertake revalidation, audit or other measures required to remain on the GMC Specialist Register or other specialist register as appropriate. The above primary care meetings and CPD should account for one session (i.e. 10% FTE).

Participation in the NHS/University Joint Appraisal Scheme is a condition of employment for all medical academic staff. In accordance with the Follett Report recommendations, the University of Leeds has been working closely with local NHS Trusts in implementing joint appraisals. The appointee will be expected to participate in a joint appraisal arrangement as agreed locally. The “joint appraisal” will be conducted by two appraisers, one from the University and one from the NHS, working together with the post-holder on a single occasion. It is also a condition of the appointment that the post-holder will have a joint job plan review with their clinical and academic manager to agree the contents of the job plan.

What will you bring to the role?

As a NIHR Academic Clinical Lecturer, you must demonstrate appointability under the NIHR Clinical Lectureship Academic Person Specification (Appendix 1) and the appropriate Royal College Clinical Person Specification or, in the absence of a clinical person specification, the appropriate areas of the Clinical Curriculum.

ACADEMIC PERSON SPECIFICATION **APPENDIX 1**

CLINICAL PERSON SPECIFICATION:

Appendix 2 - For post-CCT GP candidates:

Essential

- CCT and inclusion on the GMC Specialist Register in general practice
- MRCGP by examination or by assessment
- Evidence of appropriate annual clinical appraisal
- Experience and knowledge of UK primary care
- Evidence of commitment to clinical specialty
- Evidence of engaging in continuing professional development
- Higher degree (MD, PhD or equivalent)
- Demonstration of understanding and commitment to academic career
- Demonstration of the potential for scientific independence and the ability to lead a research team
- Potential to become a leader in chosen field
- Evidence of team working skills

Desirable

- Intercalated honours degree and/or additional qualifications
- Prizes or distinctions
- Presentation of work at a national or international meeting
- Significant publications in peer reviewed journals

For all specialties: as a qualified doctor you should obtain periodic registration with the GMC. You will be required to maintain such registration so long as you remain employed with the University of Leeds, confirming to your line manager that renewal has been carried out as required by the relevant professional organisation. You should produce documentation giving evidence of your registration upon request.

Please note: **University of Leeds terms and conditions of employment will apply**

For further background to NIHR CL posts at Leeds please see **APPENDIX 3**

How to apply

You can apply for this role online; more guidance can be found on our [How to Apply](#) information page. Applications should be submitted by **23.59** (UK time) on the advertised [closing date](#).

Applications should include the following:

- A Curriculum Vitae
- A NIHR Supplementary Questions for Candidates form – **APPENDIX 4**
- A Supporting Statement addressing the academic and clinical person specifications
