Salary: Grade 5 (£21,843 - £25,298 p.a.) Due to funding restrictions appointments are unlikely to be higher than spine point 17, £21,843
Reference: MHLDA1011
Closing date: 28 July 2017

Fixed-term for 12 months, the post being a clearly defined training post
Data Scientist Internships
Leeds Institute for Data Analytics

Do you have excellent numerical skills, with experience of using statistical or predictive techniques? Are you a recent graduate or Masters Student? Do you want to be part of a successful, leading research team?

The Leeds Institute for Data Analytics (LIDA) is offering ten internships to help to drive research activity across each of LIDA’s constituent areas: medical bioinformatics, consumer data research and multidisciplinary data analytics.

The LIDA internship programme provides an outstanding opportunity to develop skills that are in high demand, both nationally and globally, within a new, state-of-the-art facility. Our offer to interns includes the chance for you to:

- Own the delivery of a data science project and get hands-on technical experience using real data;
- Establish links with project partners (internal or external) and work to provide solutions to real world challenges;
- Build your skills and knowledge in advanced analytics, not only through mentorship and applied research, but also through on-site training opportunities in statistical analysis, visualisation, research methods and computer programming;
- Work alongside leading scholars as part of the LIDA team and gain valuable work experience.

You will be a recent undergraduate or Master’s students in a relevant field and have excellent numerical skills that may have been gained in the context of quantitative social science, computing, mathematics/statistics, medical bioinformatics or population studies.

What does the role entail?

As a Data Scientist Intern, your main duties will include:

- Helping to drive research activity across each of LIDA’s constituent areas: medical bioinformatics, consumer data research and multidisciplinary data analytics;
- Undertaking quantitative analysis on core datasets;
• Planning your own research activity in collaboration with the project investigators and other members of the research team;
• Meeting with clients and partners in support LIDA’s partnership-building efforts;
• Participating in LIDA research meetings and seminars;
• Contributing to written outputs, including research papers, case studies and other materials for publication.

These duties provide a framework for the role and should not be regarded as a definitive list. Other reasonable duties may be required consistent with the grade of the post.

What will you bring to the role?

As a Data Scientist Intern, you will have:
• Excellent all-round numerical skills that may have been gained in the context of quantitative social science, computing, mathematics/statistics, medical bioinformatics or population studies;
• Completed an Undergraduate or Master’s degree in a relevant field;
• A keen interest about using data to answer real life questions using statistical or predictive techniques;
• Good communication skills, both verbal and written;
• A willingness to work as part of a team.

You may also have:
• Experience of working with large unstructured data sets;
• Knowledge of data science, machine learning or data mining.

How to apply

You can apply for this role online; more guidance can be found on our How to Apply information page. Applications should be submitted by 23.59 (UK time) on the advertised closing date.

Contact information

To explore the post further or for any queries you may have, please contact:
